

## What can Rail Operational Development do for you?

### Developing and delivering company specific training packages

In recognising the need to constantly improve the way we train our front-line staff, RODL is now able to **provide or (if required) deliver** operational rules training for:

Train Driving, Shunting, On Train working (i.e. Conductors/Train Managers) etc.

We can also provide management appreciation training in operational rules, railway awareness, ROGS etc.

Every training course is developed specifically to a company's needs; and comes with:

1. A fully documented task and training needs analysis (see below)
2. A comprehensive training plan with detailed instructor notes
3. Complete PowerPoint training material, associated handouts and end of training assessment plan
4. Fully documented verification and validation report

All **RODL trainers** have the necessary industry training and assessment qualifications and are currently supporting Network Rail in the training of trainers to deliver GSM-R cab radio training.

### Task & Training Needs Analysis

To ensure a safe working environment for companies, employees and its customers, our bespoke Training Needs Analysis provides a comprehensive risk assessment from which a company can:

- (a) identify all potential operational hazards and
- (b) put the necessary control measures in place to remove, reduce or mitigate the risk

DCR	ACTIVITY (or other source of hazard)	TRAIN OPERATIONS TASK BASED RISK ASSESSMENT					Originally issued:	
		Network Rail, Dartmoor & Weardale infrastructure					Last Revised:	
		LOCATION	CONSEQUENCES	EXISTING CONTROL MEASURES	RISK RATING L + S + R	NEW CONTROL MEASURES	RISK RATING L + S + R	Issue number
23.	Driver fails to check traction unit(s) gauges for correct indications	• SPAD • Collision • Derailment	• Injury • Fatality • Damage to vehicles • Damage to infrastructure • Damage to business	No control measures currently in place	3 5 15	• Rule Book GERT8000 • Training • Assessment • Monitoring • Safety Briefings/Bulletin • Traction Manual	1 5 5	Page 6 of 26
24.	Driver fails to conduct functional test of braking system(s)	• SPAD • Collision • Derailment • Runaway	• Injury • Fatality • Damage to vehicles • Damage to infrastructure • Damage to business	No control measures currently in place	3 5 15	• GERT8000 Rule book • Training • Assessment • Monitoring • Safety Briefings/Bulletin • Traction Manual	1 5 5	
25.	Driver fails to identify and test hazard warning system	• Collision • Derailment	• Injury • Damage to vehicles • Damage to infrastructure • Damage to business	No control measures currently in place	2 3 6	• GERT8000 Rule book • Training • Assessment • Monitoring • Safety Briefings/Bulletin • Traction Manual	1 3 3	
26.	Driver fails to set exterior light (headlight/s tailights)	• Collision	• Injury • Damage to vehicles • Damage to infrastructure • Damage to business	No control measures currently in place	3 3 9	• GERT8000 Rule book • Training • Assessment • Monitoring • Safety Briefings/Bulletin • Traction Manual	1 3 3	
27.	Driver fails to set reminder appliances if required (DRA etc)	• SPAD • Collision • Derailment	• Injury • Fatality • Damage to vehicles • Damage to infrastructure • Damage to business	No control measures currently in place	3 5 15	• GERT8000 Rule book • Training • Assessment • Monitoring • Safety Briefings/Bulletin • Traction Manual • Professional Driving Policy	1 5 5	

### TOLO (including SIO) and accident/incident investigation training

All exercises are designed to test the effectiveness of a company's Emergency Response plan

RODL has produced a suite of training courses that allow Train Operator employees to attain and maintain the competence to respond too and deal with an operational incident.

Our unique Incident Training Aid allows participants to actually train at the scene of a simulated incident and to be an integral part of incident response. The training exercises cover:

- A Category A SPAD
- Level crossing collision.
- Terminal station collision; and
- Dangerous Goods incident.
