

What can Rail Operational Development do for you?

To continue training and assessing new Train Drivers, train/freight/infrastructure operating companies need to introduce European train driver licencing by the 29/10/13 for all their newly qualified Drivers, Practical Trainers and 'end of training' Assessors.

This work will then lead onto the introduction of European Train driving licencing for all Train Drivers and Instructors by 29/10/18.

To achieve the 29/10/13 for new Train Drivers, companies need to achieve ORR approval for them to train and assess.

To do so companies need to amend existing procedures and introduce new procedures in they are to be demonstrate compliance with the regulation.

Therefore, to support companies in achieving these critical deadlines of being in compliance with the regulations, this newsletter outlines the nature of the work Rail Operational Development Ltd (RODL) will undertake to support you.

1. **Update all relevant standards or produce new standards to cover recruitment, selection, training and assessment.**
2. **Produce a customer specific database, and**
3. **Produce the ORR application**
