How?

By providing you with competent trainers/assessors **only** when you require them.

What are the benefits of using our trainers/assessors?

- Significant reduction in operational overheads by only paying when you need a training or assessing resource;
- Total flexibility at very competitive rates;
- No additional costs attached i.e. sickness, holiday payments;
- Giving you the ability to respond to peaks in training or assessment demand
- Easy & immediate arrangements to cover sickness, annual leave or vacancies.

As an example we can offer trainers to deliver:

- Operational rules and regulations associated with the safe working of trains within sidings and terminals;
- Basic traction training or conversion;
- Driving in sidings and terminals;

We can also either produce the necessary competence management system (CMS) that underpins this training, or undertake external audit or verification to evaluate the effectiveness of your existing CMS

Competence and qualifications of trainers and assessors

- All trainers and assessors are qualified to a nationally recognised standard;
- All possess the necessary vocational and occupation competences;
- All are part of an on-going competence management system.
